

# Aircraft Detailing

by Professionally Trained &  
Skilled Experts

Partnering with the best in USA, AeroChamp introduces world class detailing services in India.

Detailing is not cleaning, it is the whole process of scanning and protecting the exterior and interior surface of an aircraft.

Operators and MROs all over the world depend on specialists to handle detailing of their aircraft. Aircraft detailing is a super speciality job and should not be just another stream of revenue for MROs. It needs an eye for precision with deep knowledge of chemistry, metallurgy, colour and texture.

## Exterior Detailing

Our methodically developed Exterior Detailing procedure by the industry experts, consists of 11 steps process.

It is a time tested proven process derived from the recommendations of OEM and best industry practice.

Our well trained and skilled technicians use aviation grade consumables and follow the approved procedure sheet to enhance the life of exterior paint and structural surface of your aircraft.

## Interior Detailing

Aircraft interior detailing includes deep cleaning, disinfection and over all cabin experience enhancement.

It includes steam cleaning, dirt removal, stain removal, leather conditioning, scratch removal, wood and metal surface polishing, touch-up and minor repairs.

Lab tested and approved material is used to retard the deterioration of cabin interior surface over the years and keep them looking fresh for longer.
